Table 1: People in the Group

Name	ID
Sai Mun Wan	657587698
Karan	4269296
Wyan Jonathan	4286056
Emmanuel Papadakis	4279780

1 Shared Part

This could be the Shared Part of the document. It is designed to be written by all members of the team.

Each member should ideally write their details in the table of contributors in the Shared Part of the document.

1.1 Comments from the second student

Best part: the lectures. Very enjoyable and informative.

1.2 Comments from the third student

CONFLICT!

1.3 Comments from the forth student

This module is entertaining, but I am not a fan of writing reports, since I think all the fun in computer science is mainly in programming.

1.4 Table of Contributors

If you want to move a table around you will need to put some parameters in square brackets, if you want it exactly where it is positioned in the text editor just uncomment the [h] below, just after begintable

This is the table of contributors (Table 1):

2 First Member

This is the section dedicated to one of the team members, and it should be written individually . It can include a range of things; first subsection is a space for you to point out the strengths and weaknesses of the module, including complaints about the module coordinator Max Wilson. The second section should have a selfie image with Max! The last part of it is the most important one. You will need to write a paragraph about what you have learned in this module. You can write it in **Bold** if you want or you can use other fonts.

Please do not forget:

- First paragraph should have your comments about the module

- Second one, a selfie img with Max

- Last one, what you learned in this module.

2.1 Comments about the module

This module has been well structured and well presented so far, however I would prefer if the lecture slides were available to look at before hand.

2.2 Selfie with Max

To include an image, you will need to remove the comments from the code below, place an image in the main folder, and do not forget to put the name of the image instead of ImgName.

Figure 1: Selfie with Max

You can then use the label of the figure to reference it later with the command $\ref$. you can comment out the next line to see an example of how it works.

2.3 What I have learned in this module

In this module, I have learned about various techniques within the software engineering process. I have learned about different models to approach software engineering (e.g. Waterfall nodel and Spiral model) and also about the requirements and specification stages in

software engineering. To help us with those stages we learned about various UML diagrams which can be used to model both requirements and specifications.

3 Second Member

This is the section dedicated to one of the team members, and it should be written individually . It can include a range of things; first subsection is a space for you to point out the strengths and weaknesses of the module, including complaints about the module coordinator Max Wilson. The second section should have a selfie image with Max! The last part of it is the most important one. You will need to write a paragraph about what you have learned in this module. You can write it in **Bold** if you want or you can use other fonts.
Please do not forget:

- First paragraph should have your comments about the module

- Second one, a selfie img with Max

- Last one, what you learned in this module.

3.1 Comments about the module

The lectures are interesting and informative, and I like the extra reading and resources given in and out of the lectures. One suggestion for improvement is to give a thorough explanation of the things that we hve to cover in the assessed labs.

3.2 Selfie with Max

Figure 2: Selfie with Max

3.3 What I have learned in this module

I have learned many things in this module including how to make requirements and specifications. In particular, I have learned how to make things such as personas, identifying stakeholders, making user stories and making use case diagrams. Overall, this has helped me understand and apply the practices of software engineers.

4   Third Member

This is the section dedicated to one of the team members, and it should be written individually . It can include a range of things; first subsection is a space for you to point out the strengths and weaknesses of the module, including complaints about the module coordinator Max Wilson. The second section should have a selfie image with Max! The last part of it is the most important one. You will need to write a paragraph about what you have learned in this module. You can write it in **Bold** if you want or you can use other fonts.

Please do not forget:

- First paragraph should have your comments about the module

- Second one, a selfie img with Max

- Last one, what you learned in this module.

4.1   Comments about the module

Max Wilson is funny. He teach us with a well structured lecture and happy to answer all of my questions. The only thing I dislike is his shirts that he's wearing in the lectures.

4.2   Selfie with Max

To include an image, you will need to remove the comments from the code below, place an image in the main folder, and do not forget to put the name of the image instead of ImgName.

Figure 3: Selfie with Max

You can then use the label of the figure to reference it later with the command $\ref$. you can comment out the next line to see an example of how it works.

My selfie with Max is in Figure 3.

4.3   What I have learned in this module

I learned how to do software engineering, using Latex, and using Git Hub.

5 Fourth Member

This is the section dedicated to one of the team members, and it should be written individually . It can include a range of things; first subsection is a space for you to point out the strengths and weaknesses of the module, including complaints about the module coordinator Max Wilson. The second section should have a selfie image with Max! The last part of it is the most important one. You will need to write a paragraph about what you have learned in this module. You can write it in **Bold** if you want or you can use other fonts.

Please do not forget:

- First paragraph should have your comments about the module

- Second one, a selfie img with Max

- Last one, what you learned in this module.

5.1 Comments about the module

This module is entertaining, but I am not a fan of writing reports, since I think all the fun in computer science is mainly in programming.

5.2 Selfie with Max

Figure 4: Selfie with Max

You can then use the label of the figure to reference it later with the command $\ref$. you can comment out the next line to see an example of how it works.

My selfie with Max is in Figure 4.

5.3 What I have learned in this module

I have learned how to write requirements and specifications for a software project, as well as the collaborative tool Git.
